EDUCATION

LDRP Institute of Technology & Research

Bachelor of Engineering in Information Technology • CGPA: 7.76/10.0

Gandhinagar, India

October 2021 – April 2025

EXPERIENCE

Software Engineer

Stridely Solutions – Ahmedabad

May 2025 – Present

- Developed AI-driven agents using Python FastAPI and LangChain, enabling natural language-based building configuration with real-time WebSocket voice interaction.
- Implemented multi-layer caching and deterministic calculation agents to optimize LLM performance and reduce latency in production.
- Collaborated with cross-functional teams to deploy AI-powered tools on Microsoft Azure, including API management, JWT authentication, and multi-tenant session handling.

Trainee Software Engineer

Radixweb – Ahmedabad, India

September 2024 – March 2025

- Designed and developed scalable web applications using .NET Core, Angular, and MS SQL Server.
- Gained hands-on experience in full-stack development and optimized APIs for performance.
- Participated in Agile sprints and code reviews to enhance collaboration and delivery quality.

PROJECTS

Performance Management System

github.com/hardik-khandala/PMS

- Built a full-stack performance management platform enabling managers to define KPIs, conduct structured employee evaluations, and generate increment-ready reports — supporting the complete appraisal workflow from goal setting to final review.
- Designed a secure role-based access control system with admin, manager, and employee roles.
- Automated the end-to-end performance review cycle — from KPI assignment and self-assessment submission to manager evaluation and increment recommendation — eliminating manual follow-ups and email-based tracking.
- Tech Stack: .NET Core, Angular, SQL Server, Tailwind CSS, SignalR

YouTube SageBot

github.com/hardik-khandala/YouTube-Sagebot

- Engineered an NLP system to extract and answer questions from YouTube video transcripts.
- Combined contextual understanding with GPT-2's generative power to provide detailed, multi-line responses.
- Enabled users to gain insights from long videos in seconds — ideal for content researchers and educators.
- Tech Stack: Python, GPT-2, youtube_transcript_api, NLTK, Streamlit, Google Gen AI

Attendance System

github.com/hardik-khandala/Attendance-System

- Built a facial recognition system for tracking student/faculty attendance with 98% accuracy.
- Integrated Face++ API for real-time identity verification and proxy prevention.
- Designed a clean, responsive interface for fast and easy attendance logging.
- Tech Stack: Django, Face++ API, HTML/CSS, JavaScript

SKILLS

Languages: C++, Python, C#, JavaScript, TypeScript

Frameworks: FastAPI, LangChain, .NET Core, Angular, Snowflake

Tools & Platforms: Git, Azure, Linux, VS Code

Concepts: OOP, REST APIs, Microservices, AI Agents, RAG, Data Structures & Algorithms

CERTIFICATIONS

Python for Data Science

NPTEL • October 2023

Git for Beginners

Udemy • August 2023

AWS Cloud Practitioner Essentials

Coursera • June 2023
